

KRISTYAN CARVALHO

Full Stack / Backend Developer - Linux, Automation and Infrastructure
Sao Paulo - SP, Brazil | kristyancarvalho@gmail.com | linkedin.com/in/kristyan-carvalho
github.com/kristyancarvalho | kristyan.dev | blog.kristyan.dev

Objective

Internship or junior role in backend/full stack development, automation, DevOps/SysAdmin or advanced technical support. ADS student at FATEC, focused on APIs, Linux, Docker, CI/CD, terminal tooling and open source.

Technical Skills

Languages	TypeScript, JavaScript, Go, Lua, Python, Shell Script, SQL, HTML, CSS
Backend and APIs	Node.js, Express, Fastify, Gin, REST, Webhooks, WebSocket, authentication, Zod validation
Data	PostgreSQL, Prisma, MongoDB/GridFS, Redis, SQLite, relational modeling, cache, migrations
Linux and Infra	Linux (Arch as daily driver), Docker, Docker Compose, systemd, Nginx, PM2, SSH, Git, GitHub Actions, CI/CD, AUR
Frontend and Mobile	React, Astro, Vite, TailwindCSS, React Native, Expo, responsive interfaces
Quality	Automated tests, Jest, RSpec, Playwright, linting, technical documentation, incremental releases

Professional Experience

Experience	Technical scope	Period
Tanggo <i>Freelance Full Stack / Backend</i>	Mobility ecosystem with APIs in TypeScript/Node.js and Go, PostgreSQL/Prisma, Redis, MongoDB/GridFS, Docker, React Native/Expo and WebSocket. Implemented passenger/driver flows, WhatsApp webhooks, real-time state control, ride estimates, cache, upload routines and tests for critical scenarios.	10/2025 - 02/2026
Pethoo API <i>Freelance Backend</i>	REST API for institutional website and admin dashboard. Delivered Express, TypeScript, PostgreSQL, Prisma and Docker features, including authentication, CRUD flows, relational persistence and a containerized local environment.	02/2025 - 05/2025
Development and Automation	Personal projects and freelance work with APIs, integrations, automations, dashboards, mobile apps, Docker deployments and Linux environment maintenance.	Current

Open Source Projects and Tools

Project	Stack / context	Technical deliveries
rendermd	<i>Go, CLI/TUI, Markdown, TOML, GitHub Actions, AUR</i>	Terminal Markdown renderer with hot reload, search, versioned releases, documentation and Linux packaging.
aurview	<i>Go, Bubble Tea/TUI, GitHub Actions, AUR</i>	Terminal package browser with search, filters, metadata, semantic versioning and release pipeline.
OpenPilot.nvim	<i>Go, Lua, Shell Script, Neovim</i>	Agent and tooling for editor automation, AI model integration and Neovim workflow optimization.
nvim-share	<i>Go, TCP, Neovim</i>	Real-time collaborative editing plugin for Neovim using TCP-based communication.
Tux Letter	<i>TypeScript, scraping, RSS, cron</i>	Automated newsletter that collects, filters and sends Linux/open source content.
GitPulse	<i>Go, SVG, GitHub API</i>	API for generating SVG badges with public GitHub activity and latest active project.

Education and Certifications

Education	FATEC - Systems Analysis and Development, in progress.
Certifications	Cisco: Cybersecurity, IoT, Modern AI, Python Essentials 1 and 2. Coursera/IBM: Node and Express Essentials; Developing Back-End Apps with Node.js and Express.
Languages	Portuguese native; English C1.

Additional

Interested in backend, automation, observability, Linux desktop/server, terminal tools, open source and development infrastructure. Available for internship, trainee and junior technology roles.
